Career Objectives

Dedicated and results-driven industrial mathematician with strong background in mathematical modelling, optimization and experience in applying mathematical principles to solve ideal-world problems in industrial setting. Proven track record of developing innovation solutions to optimize processes, improve efficiency and driven business growth. Seeking opportunities to contribute to impact project in an industrial environment.

Education

- **Federal University of Technology, Owerri** **Owerri, Nigeria**
  Bachelor of Technology in Mathematics October 2017 – November 2023
  Second Class Honour (Lower Division)

Profession Experience

Abrahamseed Travel and Consult, Asaba
Mathematics instructor (SAT) February 2025 - Present

- Delivered intensive SAT mathematics instructions to students targeting competitive U.S college admissions.
- Designed personalized lesson plans based on diagnostic assessments and student goals.
- Conducted timed practice tests and reviewed performance data to track improvement.
- Integrated strategies for critical thinking, problem-solving and time management under exam conditions.
- Provided academic counselling and study roadmaps to help students balance test prep with schoolwork

Uncle Ken's Lesson, Asaba
Mathematics instructor January 2020 - present

- Taught core mathematics concepts to over 600 students preparing for Nigerian college entrance exams
- Developed customized learning materials and revision guides to support diverse students learning levels
- Facilitated group tutorials and one-on-one sessions to address individual academic challenges
- Conducted mock exams and analysed results to provide targeted feedback and advanced programs

Community Development Service (CDS) (NYSC) *February 2024 - January 2025*

- Participated in training programs on road safety and first aid, enhancing my knowledge and skills in emergency response.
- Contributed to community service projects, promoting road safety awareness and educating the public Collaborated with team members to design and implement community outreach programs, fostering a culture of road safety and responsibility.

Sure Foundation Model College Ekiti State *February 2024 - January 2025*

- Develop leadership skills by leading classes, managing group projects, and mentoring students.

- Improved communication skills by interacting with students. colleagues, and parents.
- Learned to prioritize tasks, manage time effectively. and meet deadlines.
- Developed adaptability skills by adjusting to new environments. students. and teaching methods.

Federal University of Technology Owerri **Owerri, Nigeria**

Undergraduate Research Project July 2023 – August 2023

Project Title: Industrial Mathematics Projects Application of linear programming to profit maximization

- Applying linear programming techniques to analyse and maximize manufacturing processes results in an increase in efficiency and profit.
- Developed algorithm to optimize resources allocation, leading to cost saving of (dollar amount) skills.
- Presented findings in a clear, structured report with actionable recommendations for maximizing profitability under defined constraints.
- Developed strong analytical skills by interpreting objective functions, formulating constraints, and validating model accuracy.

Professional Development/Certificate

Matrix Algebra for Engineers, The Hong Kong University of Science and Technology, Coursera.

- Completed an applied mathematics course covering matrix operations, linear system, eigenvalues/eigenvectors, and applications in engineering.
- Worked through structured lecture modules with accompanying problem sets and quizzes, reinforcing concepts through practical problem solving.
- Gained skills in mathematical modelling and linear algebra techniques relevant to engineering analysis and computational tools.

Operations Research (2) : Optimization Algorithm, National Taiwan University, Coursera.

- Completed advanced coursework in optimization theory and algorithms, covering linear and integer programming, network flow models, and algorithmic solution methods.
- Applied mathematical modelling and optimization concepts to structured decision problems, strengthening analytical reasoning and quantitative problem solving skills relevant to data science and analytics roles.
- Developed a solid understanding of formulating real world problem as optimization models using objective functions and constraint.

Electric Power Systems, The State University of New York, Coursera.

- Completed a comprehensive course covering the fundamental principles of power generation, transmission, distribution, and system analysis.
- Developed practical understanding of power system components, operational principles, and performance evaluation techniques.
- Gained knowledge of power system modeling, operational concepts, and reliability considerations in modern power networks.

Programming for Everybody (Getting Started with Python), The University of Michigan, Coursera.

- Built a strong foundation in python programming, beginning with core programming concepts and Problem solving techniques.

- Gained experience in writing clean, readable, and maintainable python code following programming best practices.
- Learned how to write Python programs using variables, expressions, functions, and user input.

Python for Data Science, AI & Development, IBM, Coursera.

- Gained practical experience in python programming for data science and artificial intelligence applications.
- Developed skills in web scrapping, working with APIs, and reading and processing structured datasets.
- Worked with Python libraries such as Numpy and Pandas for data manipulation and analysis.

Frontend Development Intern – TechyJaunt Launchpad Program (Cohort 6)

TechyJaunt/Certificate in Beginner Frontend Web Development

- Completed an intensive internship focused on HTML, CSS, JavaScript, and responsive UI development.
- Gained hands on experience with Git/GitHub for version control and collaborative development.
- Worked in a team to build and deploy a functional web project, Kynda, using Vercel: https://kynda.vercel.app/
- Strengthened problem solving abilities by debugging errors, optimizing page performance, and ensuring cross browser responsiveness.
- Built reusable components and structured code using industry best practices to ensure clean, maintainable, and scalable frontend development.

Frontend Development Intern

Axia Africa School of Engineering

- Built and styled frontend components through structured projects and practical assignments emphasizing clean layouts, responsiveness, and cross device compatibility.
- Developed responsive and user-friendly web interfaces using HTML, CSS, Tailwind CSS, and JavaScript, following mobile first and accessibility principles.
- Applied modern frontend development best practices, including reusable component structuring, responsive web optimization, and UI consistency.

Skills

- Soft Skills: Creativity, Attention to details, Communication skills, Time management, Problem solving skills, Team collaboration skills, Strong professional ethics, Critical thinking.
- Hard Skills: Mathematical Modelling. Optimization techniques, Statistical analysis software: Visual studio code.
